

Rescue / Race Officer Duties.
Please note that advice is always at hand for anyone who is inexperienced as OOD or Requires a refresher on running the diesel boat.

The **Rescue Boat Driver** is responsible for checking that the diesel is fuelled up and operational prior to the start and that he / she has a fully charged radio and has checked communication with the race hut before going out to the course.

Please note that rescue cover does not mean it's safe to race or sail. The skipper/owner is required to make an assessment of the conditions and also ensure that the craft is in a seaworthy condition and complies with the class rules.

The **OOD** is responsible for setting the course starting and finishing the race. He / She will also record the entrants and the results onto the result sheet putting one copy on the notice board and keeping one copy for the Sailing secretary. There must be a minimum of 3 boats to qualify a start. Rescue / OOD will be awarded 3rd place points.
